CERTIFICATE of COMPLETION

This is to certify that **Ms. Maria Turkova** has participated in the Assessment Centre exercise conducted by Spherical on 16-18 August 2019.

The exercise involved a hackathon-like assignment where participants were expected to build a working web system (a podcast station) in Python programming language as members of a newly-formed team of 13 developers, working remotely, and using exclusively online means of communication and collaboration, such as Zoom, Telegram and GitHub.

Ms. Turkova has fulfilled all requirements set for participants and participated in a professional and constructive manner; she demonstrated technical competencies that allowed her to make important contributions to the final product. Spherical will be happy to respond to requests for further information and professional characterisation of Ms. Turkova.

Michael Vartanyan
Managing Director, Spherical
